Temp at the range on Sunday was pretty cold but the Sun was out and so was the switchy wind. 13 shooters made it up to our patch of paradise for the match. The conditions were "variable" to say the least. At most ranges the first stage is usually the most accommodating as for as wind conditions go but not our range. BRRRC has several gulleys that cut across the 'fairway' that can make doping the wind more alchemy than art...or science and the first stage definitely needed some voodoo. Jeff M and Van K performed some sorcery for high scores on stage 1. Stage 2 saw the high scores for the day, Jeff and Van doing the honors again. Stage 3 saw conditions similar to stage 1 but this time Jim G and Martin T conjured the high scores. Overall high score went to Jeff Mendoza for Sling Match Winner. Van Kun was next highest and F-Class Match winner. Thanks to Jeff and Van for helping set up the targets and flags and Jim and Jacques to take down and stow the same.

Next match is Dec. 11 so hurry up and reload and always remember:

"Believe the wind, it's smarter than you are."
